## SYSPRO 7!

### SYSPRO Announces New Scalable ERP Release

SYSPRO announced today that SYSPRO 7 will be available for general market release in 2013. SYSPRO 7 is all about adapting to the growth requirements of organizations by giving them the scalability, mobility, and enhanced performance they require in today's ultra-competitive marketplace. In keeping with SYSPRO's collaborative approach, the new solution is currently in "community preview" to SYSPRO resellers and partners.

### ONE-CLICK INSTALLATION

Using a cloud infrastructure, SYSPRO's Software + Services deploy methodology will enable SYSPRO 7 to be installed easily and remotely with just one click, and allow organizations to run SYSPRO in a WAN/LAN environment efficiently whilst also providing greater control over security and firewall settings across the network and/or Internet.

"For years, one of the strongest recurring statements by our customers has been that SYSPRO solutions seem like they've been purpose-built for each customer. With the new SYSPRO 7 capabilities, companies will now be able to gain even more productivity improvements for widest-possible employee use. We are always looking to help our customers achieve the very best bottom line results possible using our system," concludes Brian Stein, CEO of SYSPRO USA.

## **SYSPRO QUICK TIP**

Tab + F8

If you are working in a SYSPRO screen and want to quickly perform a different task, you can press tab + F8 and it will bring up your quick launch screen. From this screen, you may open up additional SYSPRO functionality. By adding programs to your favorites, they will appear in your quick launch screen.

## **LOCAL NEWS**

### **THE SHALE MIRACLE IN TEXAS**

Texas became the USA's second-largest economy during the past decade - displacing New York and perhaps heading one day toward challenging California - in one of the biggest economic shifts in the past half-century.

The rapidity with which oil and gas operators have ramped up development of huge oil-containing Texas shale formations, such as the Eagle Ford Shale in South Texas and the Wolfcamp/Wolfberry play in the Permian Basin, has been truly astonishing. Just three years ago, Texas statewide oil production had bottomed out at just more than 1.1 million barrels a day after a 25 year decline from the boom times of the early 1980s. By February of this year, that daily output had more than doubled, to 2.295 million barrels a day. [Read more.](#)
